

THE BUSINESS GUIDE TO CLOUD COMMUNICATIONS

How a cloud-based phone system can make your businesses more agile, flexible and innovative

WHY CLOUD COMMUNICATIONS?

Growing businesses are on the lookout for services and tools that will help them level the playing field. So, when a product as synonymous with business as the telephone is revolutionized, it's time to take a closer look.

A cloud-based phone system can make your businesses more agile, flexible and innovative. Cloud Communications are often more affordable, flexible and reliable—providing greater access to innovative features.

This guide identifies the top ways your small business can benefit from a cloud-based phone system. Each chapter takes an in-depth look at the features of this new telecommunications technology.

1

THE TOP REASONS FOR
PURCHASING A
NEW PHONE SYSTEM

THE MAIN REASONS GROWING COMPANIES ARE INTERESTED IN PURCHASING A NEW PHONE SYSTEM

17%

Specified lack of reliability as a pain point with their current phone system

Wanted a phone system with increased functionality

15%

Wanted a phone system that saves them money

Buyers also noted customer support as a major pain point

DO ANY OF THESE PURCHASE FACTORS
RESONATE WITH YOU AND YOUR COMPANY?

A background pattern of a network or mesh, consisting of white lines connecting various sized white circular nodes on a light gray background. The nodes are scattered across the entire page, creating a complex web-like structure.

2

A CLOSER LOOK AT CLOUD COMMUNICATIONS

WHY CLOUD COMMUNICATIONS?

A key benefit is value

There are no long distance charges and maintenance and installation fees are either very low or nonexistent. This is beneficial for growing businesses, especially smaller enterprises.

Cloud phone systems require minimum or zero on-site equipment

This eliminates the need for a PBX (private branch exchange) box taking up space in a closet. This is especially helpful for any company without an in-house IT department.

Cloud Communications allows businesses to have a full phone system wherever there's an Internet connection

You can change answering rules, access voice mail and view call activity anywhere there is an internet connection.

Integrate apps into a cloud phone system

CRM, ERP, Scribe, Fax and other apps turn a cloud phone system into a communication hub that enhances business.

HAS YOUR BUSINESS CONSIDERED A VENDOR THAT EXCELS AT CLOUD COMMUNICATIONS?

3

CLOUD COMMUNICATIONS AND YOUR BUSINESS

IS CLOUD COMMUNICATIONS RIGHT FOR YOUR BUSINESS?

Is your business growing or scaling back?

Companies that are either expanding or downsizing benefit from the flexibility provided by Cloud Communications.

Is your business phone-dependent?

If your company requires employees to be in constant communication with clients and prospects, a managed cloud phone service is a wiser choice, given the higher call quality, security and reliability.

What tools does your company need?

A cloud-based phone system provides advanced features, such as contact center call queuing, interactive voice response, computer technology integration, multimedia recording, and mobile phone management—to name a few.

Do you have time to manage a phone system?

For businesses that do not have the time and IT staff to dedicate to installation and management of their system, Cloud Communications offers expert installation, ongoing support and automatic software upgrades.

DO ANY OF THESE FEATURES RING TRUE TO YOU AND YOUR BUSINESS?

The background of the slide is a light gray color with a white network pattern. This pattern consists of numerous small white circles (nodes) connected by thin white lines, creating a complex web of interconnected points across the entire surface.

CLOUD
COMMUNICATIONS
MAKES YOU
MORE FLEXIBLE

CLOUD COMMUNICATIONS HELP BUSINESSES BE MORE FLEXIBLE, NIMBLE AND RELEVANT

These days, growing businesses need to be nimble and tenacious

The ability to watch your bottom line is more important than ever. You have to be able to make changes faster and without a lot of overhead costs.

Your business phone system has to be flexible enough to keep up

With a cloud-based phone system, you can set up with less installation costs and hassles—just plug your system in and use it right away.

You can scale up and scale down to keep up with growth

When you're facing growth, or rapid spikes in business, you can add as many seats or offices as you like, easily.

Face it, sometimes your colleagues are out of the office or working from home

A cloud-based phone system provides mobile access to employees, so they can communicate anytime, anywhere and on numerous devices.

IS IT IMPORTANT THAT YOUR PHONE SYSTEM SCALES WITH YOUR BUSINESS?

5

THE BENEFITS OF
CLOUD
COMMUNICATIONS
APP INTEGRATION

THE NUMBER OF ENHANCEMENTS AVAILABLE FOR CLOUD PHONE SYSTEMS CONTINUES TO GROW

Once your company adopts a cloud-based phone system, you can take advantage of the following integrations:

Mobility

Now, your business line can ring to your desk phone, cell or both. Also, laptops or desktop computers can be turned into "soft phones" by adding a headset.

Call Recording

Call audio can be captured and delivered to your inbox so you can listen to it anytime.

Scribe

Voicemails can be transcribed and sent to your inbox.

Automated Attendant

Your service will automatically answer and route inbound calls to the people best qualified.

Instant Messaging

You'll have the ability to collaborate and communicate with other employees across the office, across town, or across the globe.

Desktop + Web Sharing

You can raise the quality of your online meetings by digitally sharing important visual materials.

DOES YOUR PHONE SYSTEM VENDOR PROVIDE THE RIGHT FEATURES FOR YOUR BUSINESS?

6

HOW APP INTEGRATION
ENHANCES BUSINESS
COMMUNICATIONS

A CLOUD-BASED PHONE SYSTEM OFFERS METRICS AND DATA TO HELP IMPROVE INTERNAL PROCESSES

Observe. Measure. Optimize.

By utilizing data gathered from integrations with your cloud-based phone system, you will be able to gather data, that you can then use to analyze and optimize.

Data can help you track the amount of time your employees are spending with clients

You'll be able to track which calls are driving revenue, which members of your sales force are responsible for the biggest wins, and who is making their quotas and who is not.

Works with the Apps you use

Cloud Communications phone systems offer integrations with popular business process applications for stronger team performance.

Find a Premium cloud provider

Make sure the cloud phone vendor offers pre-packaged integrations to speed implementation and eliminate custom programming fees.

IS YOUR TELECOMMUNICATIONS PROVIDER GIVING YOU ANALYTICS OPTIONS TO HELP YOU SUCCEED?

A background pattern of a network or mesh, consisting of white dots of varying sizes connected by thin white lines, set against a light gray background. The dots are arranged in a somewhat random but interconnected fashion, creating a sense of connectivity and structure.

7

HOW CLOUD
COMMUNICATIONS
PROVIDES TRUE
MOBILITY

INTEGRATE MOBILE DEVICES WITH YOUR BUSINESS PHONE SYSTEM

With the right cloud-based phone system, your team won't lose a dropped call when they walk into a building

You can help your organization take control of in-building coverage problems by leveraging wireless LAN networks to provide wireless coverage across your entire enterprise.

You will have the ability to take advantage of the same productivity-boosting features you depend on in the office

Your team can leverage benefits including video conferencing with room-based systems, peer-to-peer video, web conferencing, calendar access, CRM integration, instant messaging, and presence.

Connect employees' favorite mobile devices with your business phone system

Employees can BYOD (bring your own device) and stay connected from any location around the world on any network—while keeping business and personal calls completely separate.

Users can separate their business and personal communications on a single device

Employees will never give a customer their personal mobile number again; instead, their company number follows them from desk to field. And managers can rest easy knowing that customer lists stay with the company, not the employee.

CAN YOUR BUSINESS BENEFIT FROM
GREATER EMPLOYEE MOBILITY?
