

SIP Trunking & SIP Trunk Manager

SIP and SIP Trunk Call Manager

What is SIP Trunking?

SIP Trunks connect businesses to Gamma's nationwide network, give access to the PSTN and provide a more flexible and lower cost alternative to ISDN. Gamma SIP trunks work seamlessly with all the leading IP PBX brands in the UK market, including support for Skype for Business / Microsoft Teams.

How does it work?

Gamma SIP Trunks connect your PBX to the PSTN via broadband, Ethernet or private circuit into our national network. Connection from any site to Gamma's network is delivered as an end-to-end service with an availability guarantee, voice channel guarantees and voice Quality Of Service.

Key benefits of SIP

- Number flexibility
- Cheaper per channel than ISDN
- Free UK calls, mobile calls and fraud protection
- Business-grade voice and data convergence
- Line and PBX rationalisation
- Business continuity as standard
- Voice and data from one connection
- Add and remove lines quickly and easily
- Data agnostic - connect how you like
- Save up to 50% on call costs compared to ISDN

Customer pain points

- Dispersed workforce
- Relocating to new premises
- PBX refresh
- Rationalising current infrastructure
- Need a business continuity solution
- Cost reduction
- Scalability

SIP and SIP Trunk Call Manager

What is SIP Trunk Call Manager?

SIP Trunk Call Manager provides all the features and benefits of SIP Trunks together with centralised call control and a host of features.

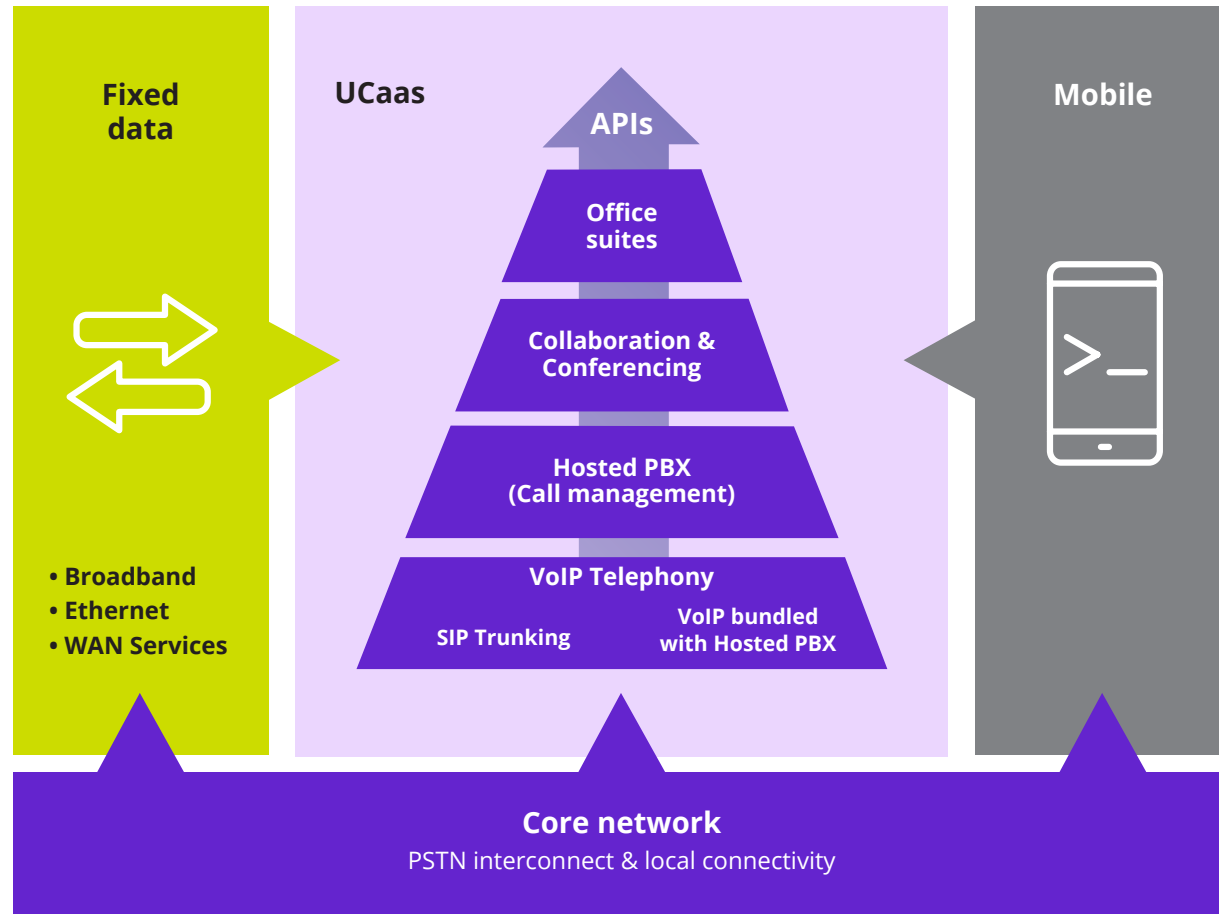

This includes market-leading call bundles and the only fraud management tool that enables customers to set spend limits. SIP Trunk Call Manager offers a powerful business continuity solution, giving you the ability to manage your number estate and all aspects of your inbound calls. Consolidate all your numbers onto a single platform and never miss a call!

Key benefits of STCM

- Tailored business continuity – never miss a call
- Direct control – allows users to configure and control their own solutions
- 01, 02, 03 and 08 termination on subscribed Gamma SIP Trunks – no number translation
- Seamless provisioning via the Gamma SIP portal
